

Our Company

Sconza Candy Company in Oakdale, California, has been manufacturing premium chocolate and confectionery products since 1939. Our Company is one of the largest manufacturers of panned products in North America, producing primarily private label products for some of the world's largest retail and CPG Companies. We are a Company committed to our Team Members and their personal and professional growth and recognize that each of them directly contributes to our success. Our 500,000 square foot facility is located in Oakdale, California, approx 95 miles east of the San Francisco Bay Area and approx 95 miles south of Sacramento. If you're a dynamic person and want to directly impact a leading confectionery company, we want you on our team!

Position Summary:

The Assistant food Technologist is responsible to provide technical support aid in research and development and food safety activities.

Major Responsibilities:

- Create ingredient declarations and nutritional table information and validate for accuracy and compliance to regulations
- Participate in product development ideation
- Assist in the development of new products and improvement to current products, through proper formulation and evaluation
- Data entry and document scanning work when necessary including help with material tracking and the building of BOM's for the new MRP/ERP systems
- Aid in the inspection & formal record-keeping of incoming food ingredients and packaging materials for compliance to all company and customer specifications. This includes label accuracy checks on new orders of packaging materials
- Provide HACCP support work such as record keeping, inspections, verifications, and aid in validation work
- Aid in the implementation of the company microbiological monitoring program and environmental testing program by taking samples, preparing them and shipping them to the proper laboratories and reporting and maintaining a log of results
- Provide allergen program support work by aiding in allergen inspections and taking allergen samples, preparing them for shipment and maintaining a log of results
- Aid in product shelf life studies by selecting samples, placing the correct number of samples in the different storage locations, pulling them at proper intervals, preparing the samples for both sensory and analytical testing
- Performing ongoing product performance testing such as heat susceptibility testing, bag gas composition, leak testing, color comparisons, etc and report results
- Perform product defect and non-conformance audits for certain items and maintain a log of defect levels in a database format
- Understand and comply with all HACCP and CGMP requirements and processes
- Understand and comply with RSPO and organic programs
